

Receipt for Samples- Supplemental Information
Ames Warehouse Site
11/1/17

On 11/1/17, Mr. [Ex. 6 - Personal Privacy] granted EPA permission to collect 2 ash samples from the former Ames Warehouse property. Mr. [Ex. 6 - Personal Privacy] granted EPA and 2 EPA Contractors (Weston Solutions, Inc.) access to the property. Mr. [Ex. 6 - Personal Privacy] did not restrict EPA from any area of the property.

EPA On-Scene Coordinator Christine Wagner informed Mr. [Ex. 6 - Personal Privacy] that EPA would collect samples from two locations and that enough sample volume would be collected to fill two sets of sample containers.

EPA first directed the contractor to collect a sample from an area where drums were observed. Air monitoring was performed throughout the sampling event. Two sets of sample containers were filled with the ash from around the drums. The ash was collected into both containers simultaneously to make the samples as similar as possible. The drums were not opened or handled by EPA or the EPA contractor.

Ash Sample #1

Collected around drum area on near east side of property

Ash Sample #1 was collected from ash around drums

39° 14' 46.58"

-81° 13' 49.95"

Sample #2

Collected from west side of property near entrance gate

Ash Sample #2

39° 14' 53.20"

-81° 13' 50.47"

Mr. [REDACTED] was not on scene during collection, but arrived just as Sample #2 was being completed.

Two sets of samples were collected from each location. A set of samples includes 1 8-oz. jar and 1 liter jar. Mr. [REDACTED] was presented with both sets from each location and offered the choice to choose one set from each. The samples were placed into plastic bags. EPA's contractor prepared a chain of custody for

Mr. [REDACTED] to submit to the laboratory if he chooses to have his samples analyzed. EPA's contractor advised Mr. [REDACTED] to keep the samples cool for preservation.

A hand-written receipt for samples was prepared and both EPA Christine Wagner and Mr. [REDACTED] signed the paper. Mr. [REDACTED] requested additional information including photos and GPS locations, which are included in this document.

Analysis

Ash samples from both locations will be tested by EPA for the following parameters:

<i>Analysis</i>	<i>Laboratory</i>
Dioxin/Furans	Teste America Pittsburgh
Semi-Volatile Organic Contaminants	ALS Environmental Middletown PA
PCBs/Pesticides	ALS Environmental Middletown PA
Metals and Mercury	ALS Environmental Middletown PA

OSC Wagner informed Mr. [REDACTED] that EPA would provide him a copy of the results. EPA and Weston personnel then departed the property.
